

Qingyun Yao

Ithaca, NY | yaoqingyun849@gmail.com | 551-256-1575 | linkedin.com/in/qingyun-yao-79b74b369 | [Portfolio](#)

EDUCATION

Cornell University, Ann S. Bowers College of Computing and Information Science

Ithaca, NY

Master of Professional Studies in Information Science

Expected Dec 2027

Relevant Coursework: Human-Computer Interaction Design, Human-AI Interaction, Designing Technology for Social Impact

The Pennsylvania State University

University Park, PA

Bachelor of Science in Human-Centered Design and Development

May 2026

GPA: 3.69/4.0 | Dean's List (6 semesters)

SKILLS

Design: Figma, Wireframing, User Flows, Low-/High-Fidelity Prototyping, Interaction Design, Responsive Design

UX Research: User Interviews, Surveys, Usability Testing, Heuristic Evaluation, Accessibility

Development: HTML, CSS, JavaScript, Java, Python, SQL, Git, GitHub, Unity

RELEVANT EXPERIENCE

UI Design Intern

Jun 2025 - Aug 2025

Xingsi Study Abroad Consulting Co., Ltd.

Hangzhou, China

- Designed responsive Figma interfaces for prospective students, translating study-abroad service information into clearer page hierarchies and task flows.
- Mapped navigation flows and prototyped interactive components for service discovery, consultation forms, and university-information pages.
- Refined form layouts and content structure to make key consulting information easier to scan and complete.

RELEVANT DESIGN PROJECTS

MyChart UX Research - Healthcare Communication

Sep 2026 - Present

Cornell University, MPS Information Science

- Created interview protocols, consent workflows, and observation prompts for non-native English speakers with healthcare experience in Ithaca.
- Framed usability and UX issues around locating test results, understanding medical information, symptom communication, and trust to identify unmet needs and product opportunities.

Nighttime Mobility Cane Redesign

Sep 2026 - Present

Cornell University, MPS Information Science

- Reviewed research on low-light visibility, device weight, portability, and one-hand folding to translate evidence into design requirements for nighttime cane use.
- Applied human factors, inclusive design, and value-sensitive design to evaluate tradeoffs among safety, independence, portability, and psychosocial impact.

Between Feelings - AI-Based Emotional Awareness Web Application

Jan 2026 - May 2026

- Conducted user research on emotional self-awareness and stress tracking among university students; translated findings into interface requirements and iterated through usability testing.
- Designed and helped implement emotional logging, history, and authentication flows; coordinated team development through GitHub.

UI Design Programming Based on User Experience - UCLA Research

Jul 2025 - Nov 2025

- Applied HCI principles and heuristic evaluation to build Figma user flows and low-fidelity interfaces for a multimodal emotion-awareness concept using facial-expression and voice-emotion analysis.
- Authored a design paper accepted by the Journal of Entrepreneurship and Innovation.

Highway Secondary Collision Prevention - Emergency Alert System

May 2024 - Aug 2025

- Interviewed 8 drivers and 3 secondary-collision victims to identify emergency-response challenges and define requirements for a roadside alert concept.
- Prototyped a guardrail-button emergency alert flow and evaluated it with 36 classmates; 80% validated the concept's effectiveness.

Online Sports Ticketing System Redesign

Aug 2024 - May 2025

- Analyzed 25 survey responses and 5 interviews to identify pain points in wait times, navigation, and interface complexity.
- Created low- and high-fidelity Figma prototypes and simplified the end-to-end ticket-purchase flow based on research findings.

Women's Safety Application Development

Aug 2024 - May 2025

- Led a 4-person team to design a high-fidelity Figma prototype for safety education, real-time alerts, emergency response, and customer support while coordinating feature scope and interaction flows.
